How commissions are calculated

A detailed guide to our commission structure and how they are calculated for the following firm accounts:

- denvMT5 – MT5 Financial, MT5 Financial STP, MT5 Swap-Free, MT5 Standard, MT5 Zero Spread
- denvX
- denvTrader

denvMT5 Financial

Forex

The example below illustrates how commissions are calculated for a round trade on Forex (EURUSD).

When a client opens a position of 1 lot, the commission would be USD 7.

USD 7	1 Lot	USD	USD 7
Commission rate	Volume	Currencies	Commission

As soon as the trade is closed, the commission for the closing deal would be USD 7.

USD 7	1 Lot	USD	USD 7
Commission rate	Volume	Currencies	Commission

The total commission earned for this trade would be USD 14.

USD 7	USD 7	**+USD 14**
Opening trade	Closing trade	Total

This formula applies to **Commodities (Metals) and Forex.**

Cryptocurrencies

The example below illustrates how commissions are calculated for a round trade on Cryptocurrency (BTCUSD).

When a client opens a position of 1 lot, the commission would be USD 1.

Adjusted Commission rate	Volume	Contract Size	Conversion rate	Commission
USD 0.001 USD 0.0005	1 Lot	1	1	USD 1

As soon as the trade is closed, the commission for the closing deal would be USD 1.

Adjusted Commission rate	Volume	Contract Size	Conversion rate	Commission
USD 0.001 USD 0.0005	1 Lot	1	1	USD 1

The total commission earned for this trade would be USD 2.

USD 1	USD 1	**+USD 2**
Opening trade	Closing trade	Total

This formula applies to **Commodities (Energies), Cryptocurrencies, Stocks, Stock Indices,** and **ETFs.**

denvMT5 Financial STP
