

USER GUIDE

Alpha Generation on Deriv MT5

Alpha Generation is a powerful tool that enhances your trading experience on Deriv's MT5 platform. It includes three core indicators, designed to help you explore market trends, identify trade opportunities, and determine entry/exit points.

WHAT YOU'LL GET

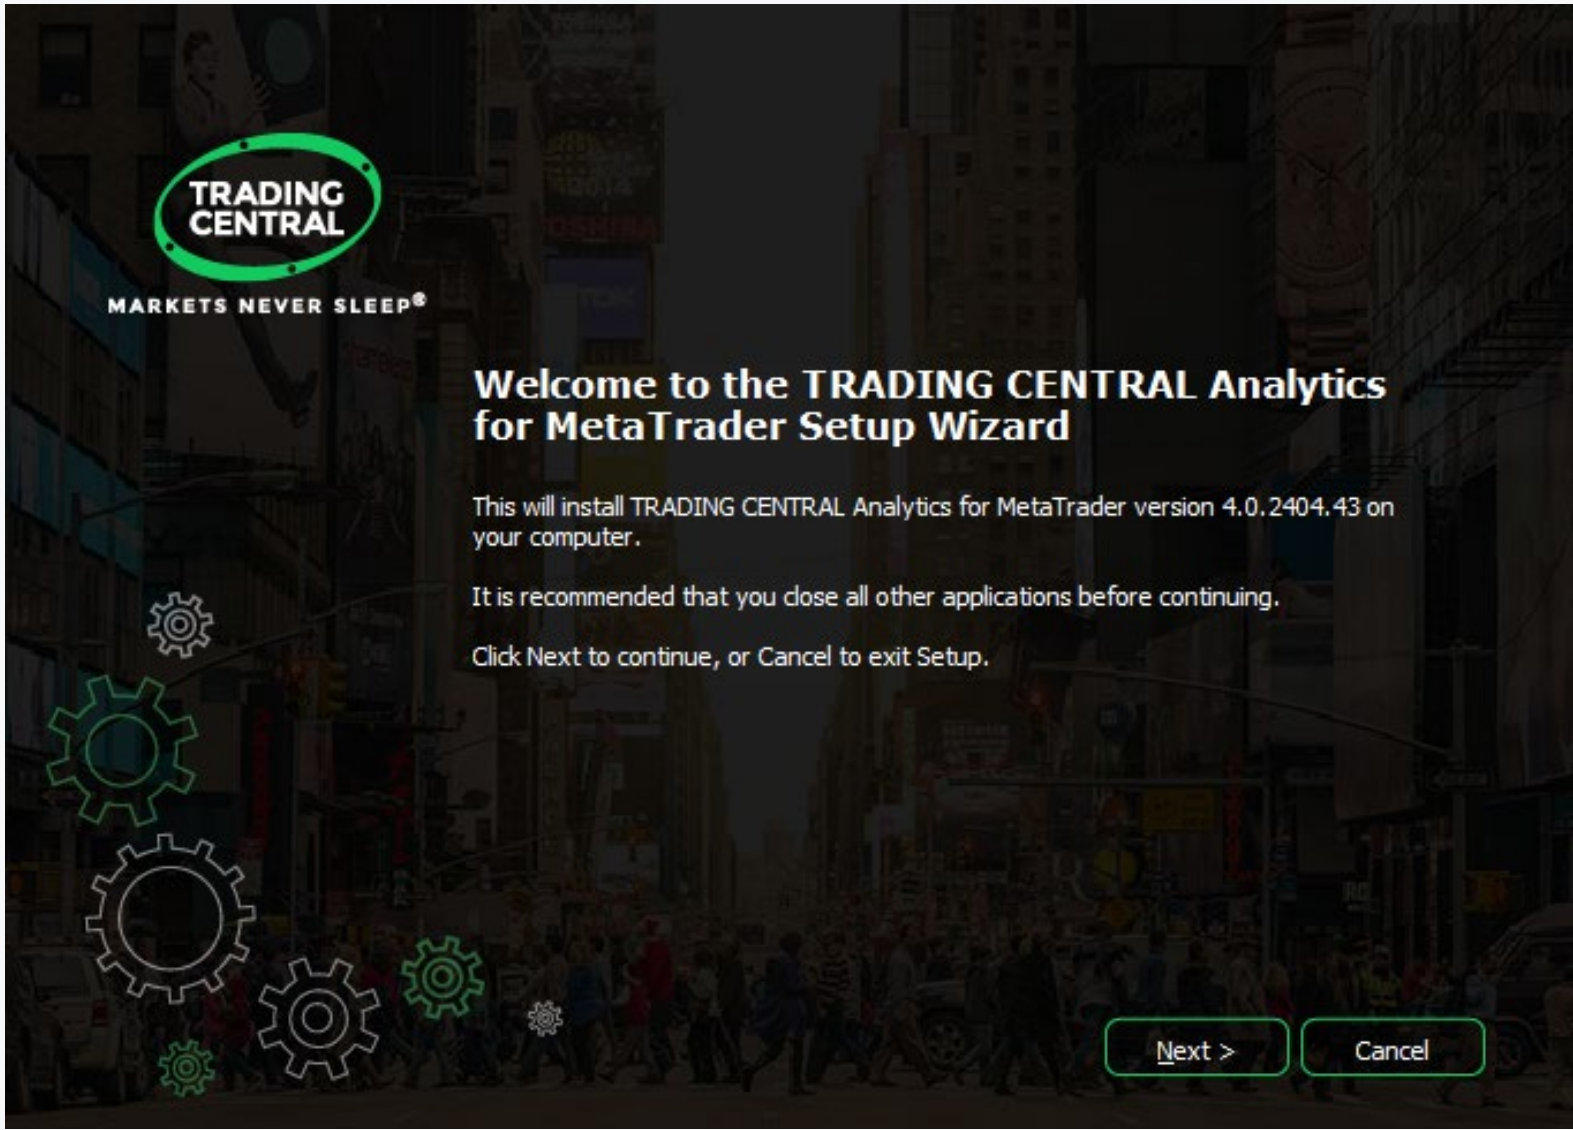

- 1 Analyst views
- 2 Adaptive candlesticks
- 3 Adaptive divergence convergence (ADC)

STEP 1

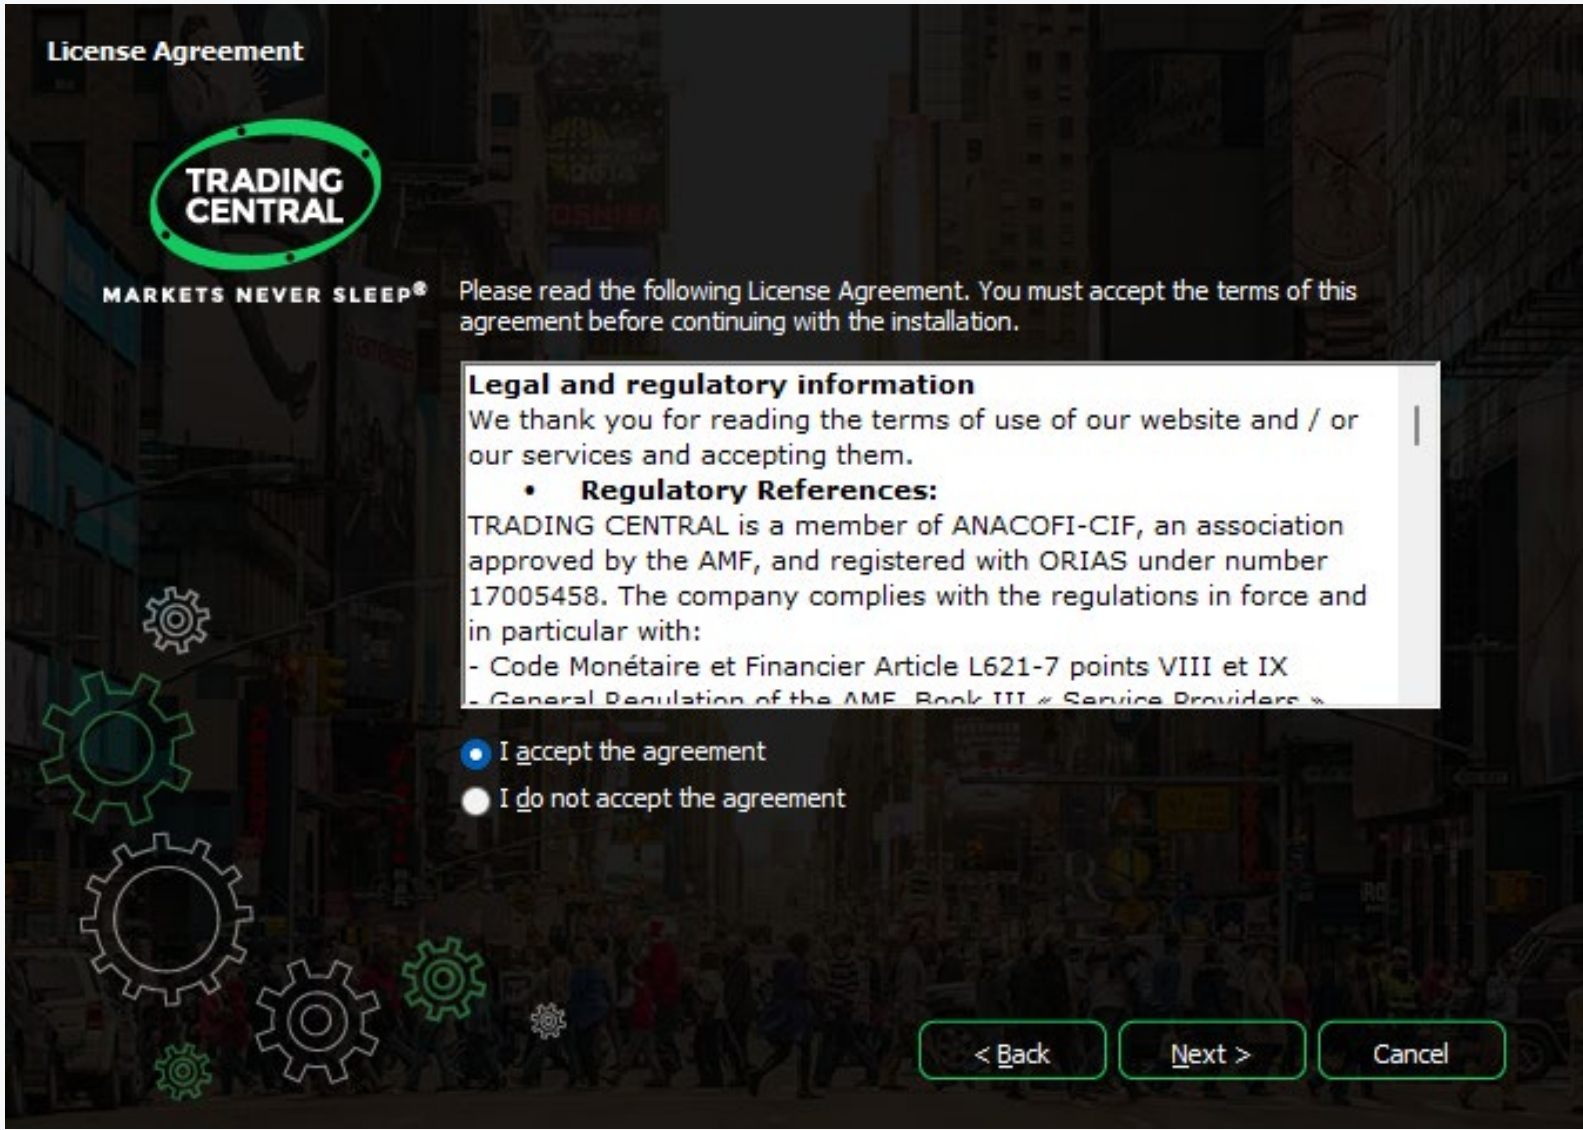

Download and install

1. Download the **Alpha Generation plugin** [here](#)
(Available only for Windows)
2. Install Alpha Generation

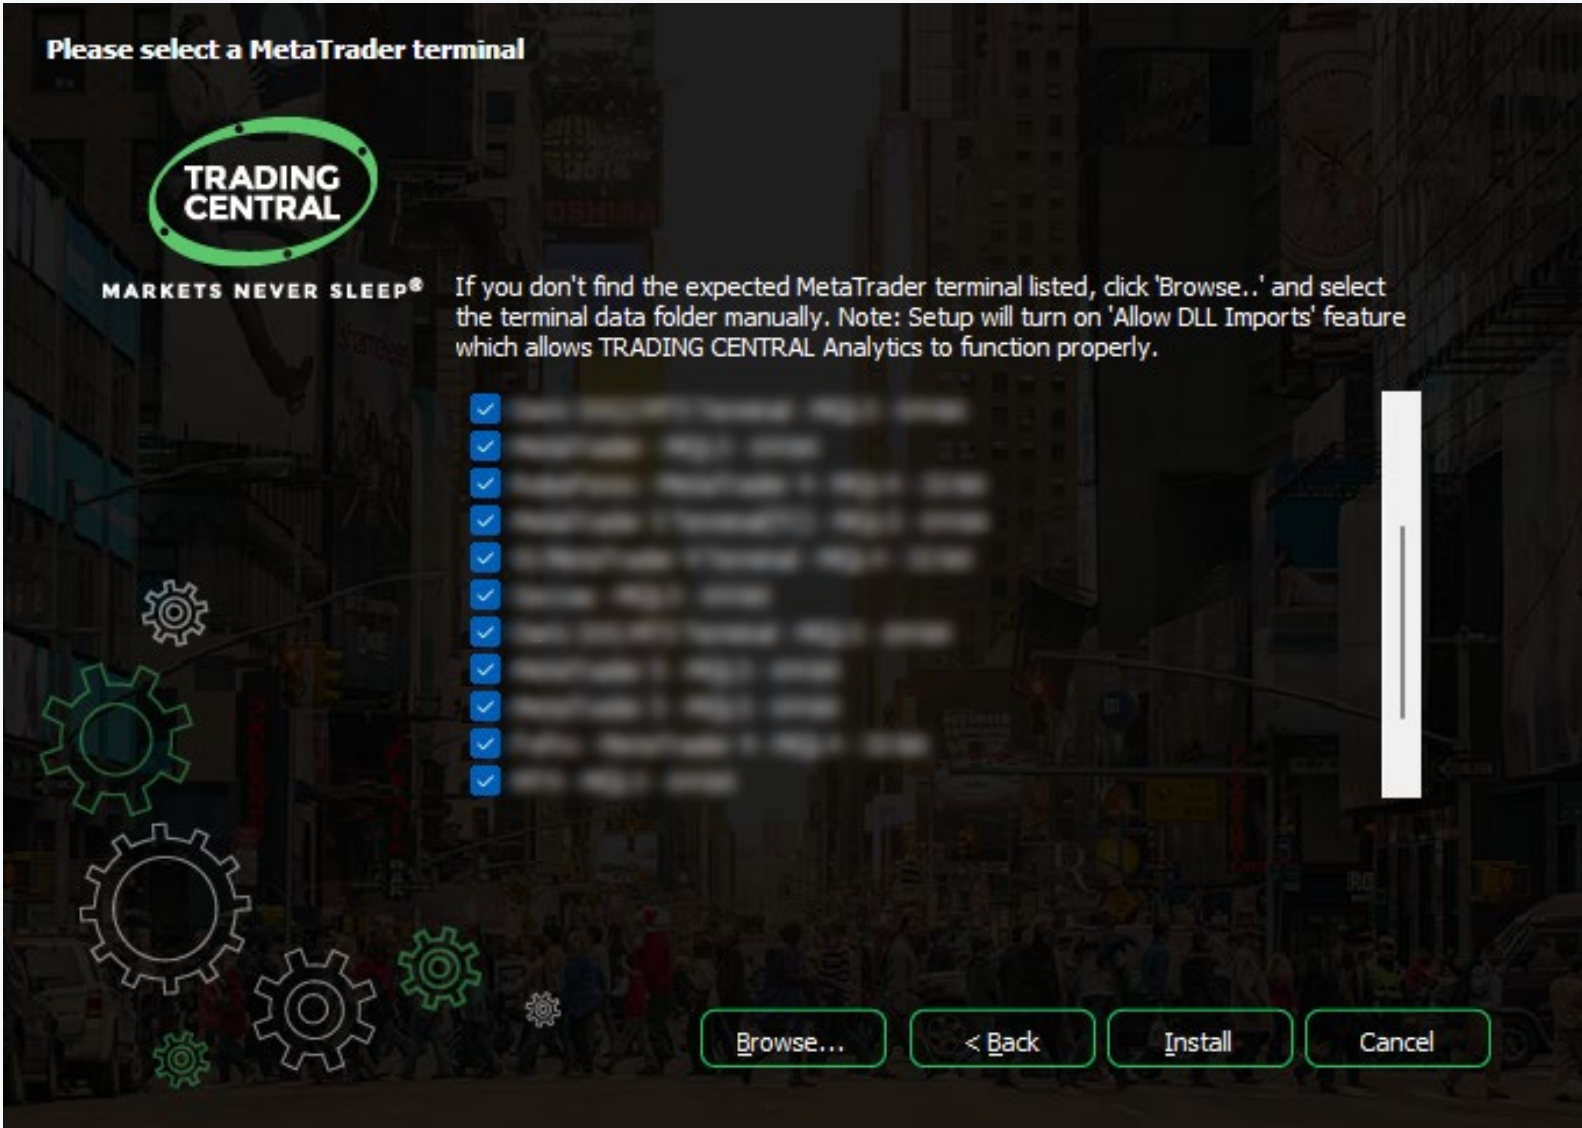

1. Double-click on the downloaded file.

2. Follow the on-screen instructions from the installation wizard.

3. The plugin will automatically integrate with your Deriv MT5 platform.

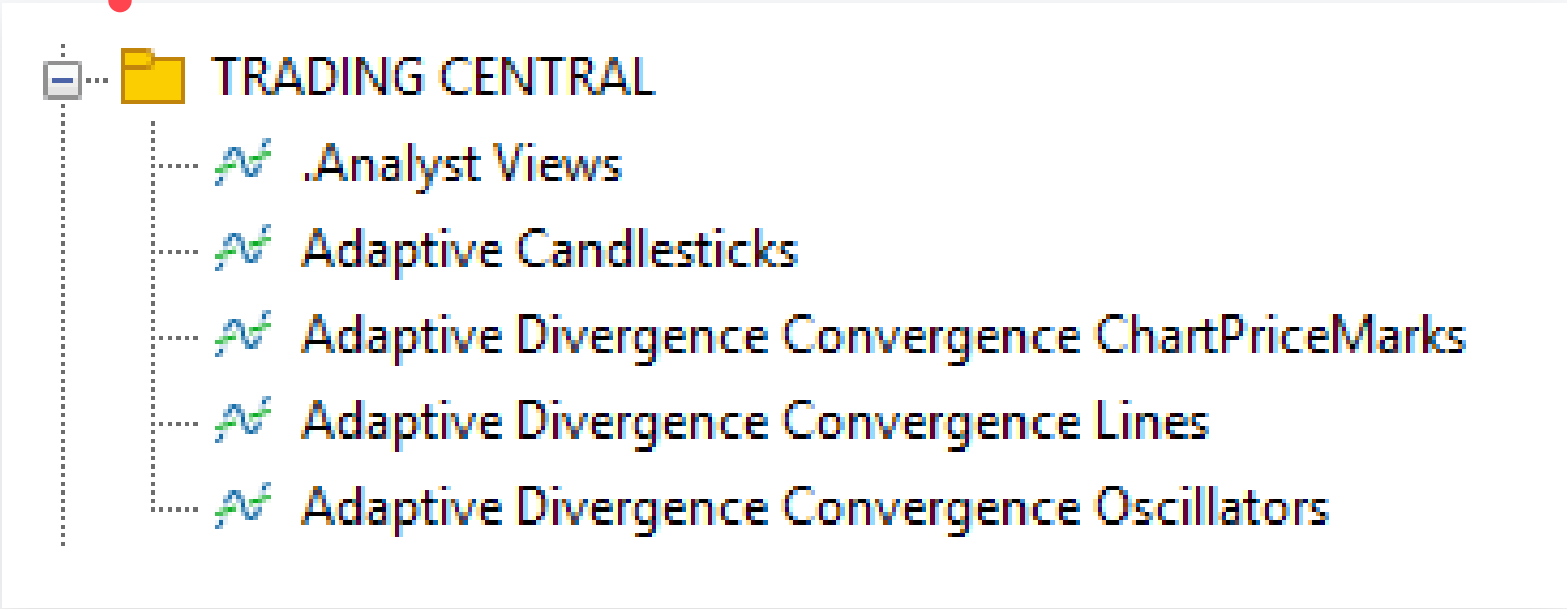

STEP 2

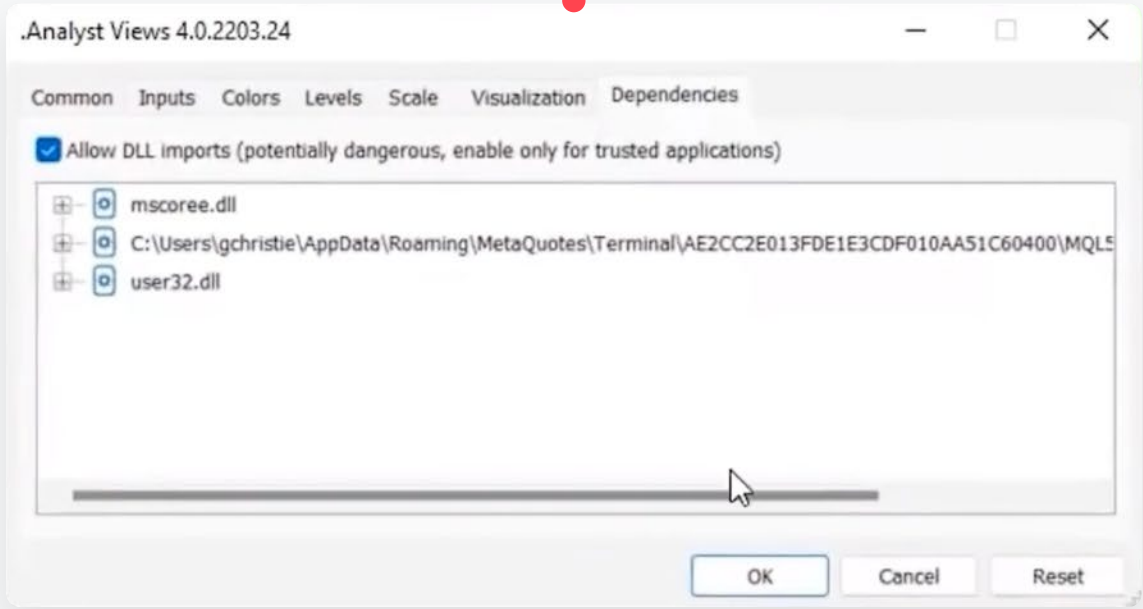

Access the indicators on MT5

- 1. Launch the Deriv MT5 App
- 2. Locate your indicators
- 3. Drag and drop

In the Navigator panel of MT5, find the **Trading Central** indicators.

To start using an indicator (e.g., Analyst Views, Adaptive Candlesticks, or ADC), simply drag it onto your MT5 chart.

STEP 3

Using the indicators

1

Analyst views

- Get instant trading direction recommendations and key target levels.
- Alternative Scenarios are offered if market conditions change, giving you a backup plan when key pivot levels are crossed.

3

Adaptive divergence convergence (ADC)

- Ideal for short-term traders.
- Signals: It displays long/short entry and exit signals based on adaptive market conditions.

2

Adaptive candlesticks

- Identify Candlestick Patterns quickly across any chart.
 - The tool combines unique quantitative analysis with candlestick patterns for a more informed decision-making.
-
- Price Indicators: Use the slow and fast lines to spot price trends and manage your trade timings.
 - Oscillators: Track fast and slow oscillators to confirm trends and market movement strength.

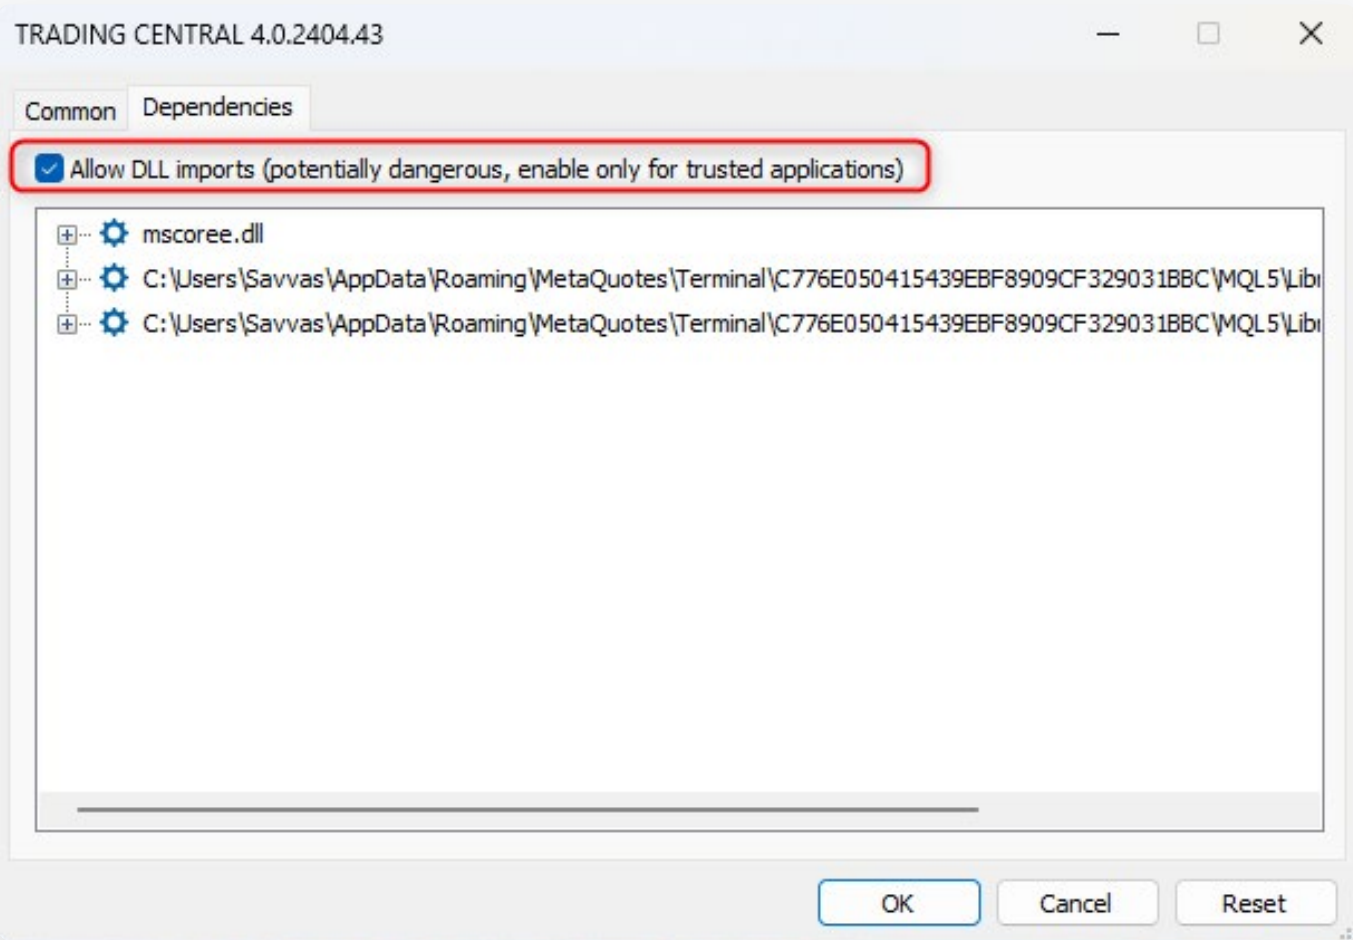

STEP 4

Access the Expert Adviser panel

1. In the Navigator panel, find **Expert Advisors**, and look for **Trading Central**. Drag & drop Trading Central onto the chart.

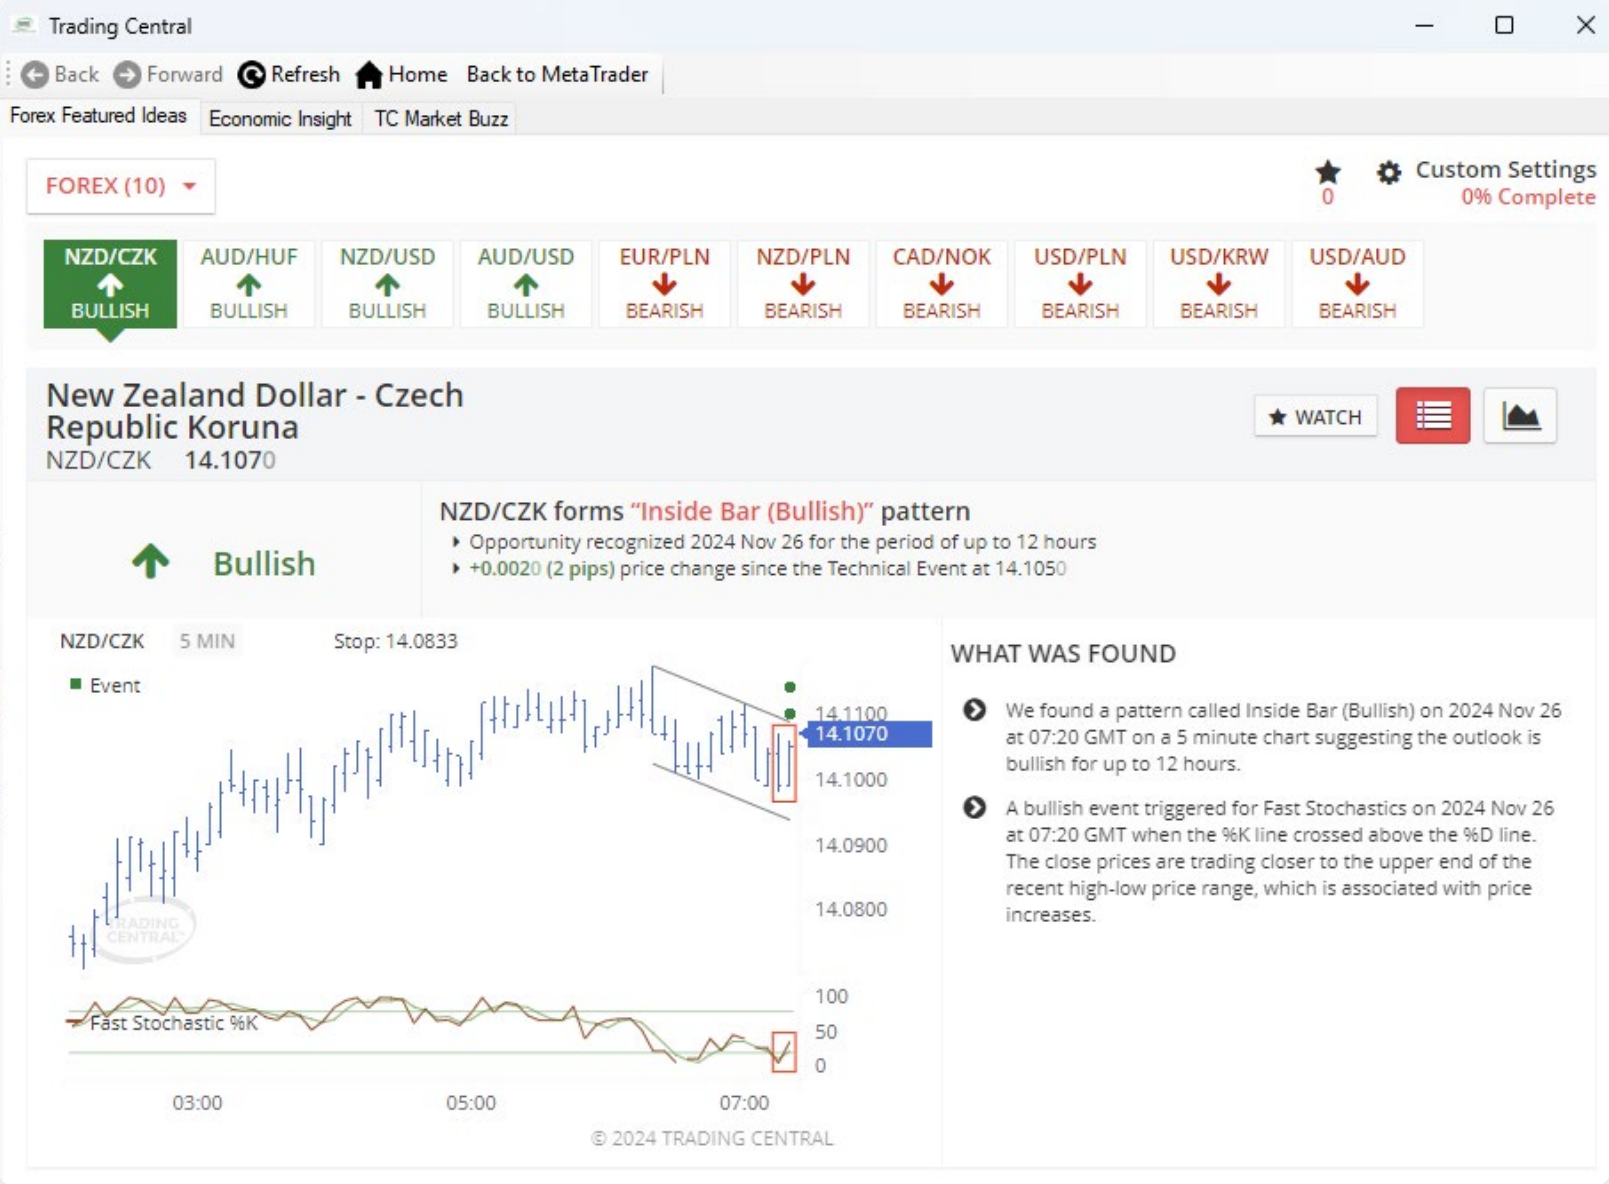

2. Once dragged, a window will pop up. In the **Dependencies** tab, select **Allow DLL imports**. Press OK.

3. The Trading Central pop-up window will now appear, giving you access to the following tools:

- **Featured ideas**
- **Economic insight**
- **Market buzz**

Get started

You're all set! Start making informed trades with Alpha Generation on Deriv's MT5 platform.
